Risk assessment – Green Beret 2024 Base 3 – Country Outlines

Equipment injury	Participants, Leaders/Explorer helpers	Low	<ul style="list-style-type: none"> • Condition of equipment reviewed prior to event and repaired/replaced as required. • Activity involves minimal equipment – question sheets, paper and pencils only • No sharp items, glues/solvents or heat sources 	Low
Behaviour/ overexcitement Upset, injury	Participants, Leaders/Explorer helpers	Medium	<ul style="list-style-type: none"> • Event code of conduct in place to set clear expectations of behaviour. • Activity process and outcomes clearly explained to participants prior to them starting the activity (instructions written on base question sheet) 	Low
Individual Needs Exclusion, injury	Participants, Leaders/Explorer helpers	Medium	<ul style="list-style-type: none"> • Participants are taking part in teams. • The Leader responsible for each team must provide information about significant medical requirements and additional needs during the booking process to the Green Beret organising team. • Green Beret organising team should discuss any needs with group leaders before the session is started and inform base leaders. • Group leader is responsible for making sure teams having access to essential medication i.e. inhalers where required. 	Low
General Injury	Participants, Leaders/Explorer helpers	Medium	<ul style="list-style-type: none"> • First aid kit will be available • Groups are responsible for their own first aid in the first instance – if a participant requires first aid, they will be advised to return to their Group location. • Additional first aid kit and defibrillator are available at reception/activity and key staff on duty to offer further support if required. 	

Never be afraid to stop an activity if it is becoming unsafe!

Don't forget, as part of your programme planning, you should have contingency activities in reserve just in case you can't do what was planned or you need to stop half way through. Make sure this is shared with those involved, so everyone knows how to respond. You should have risk assessed contingency activities prior to them taking place and communicated key information to those involved as with all activities.
